Ilhan Klisura
Software Engineer

Passionate Software Engineer with experience in building scalable, secure, and high-performance web applications using React.js, Vue.js + TypeScript, C#/.NET Core, PHP and SQL Server/MySQL. Skilled in designing clean architectures, implementing CI/CD pipelines (Jenkins, GitHub Actions), and integrating REST APIs.

I have a proven track record of delivering solutions in both enterprise and startup environments, optimizing database performance, and enhancing user experiences through well-designed UI/UX. Always eager to learn emerging technologies like Golang and cloud platforms to stay ahead of industry trends.

Bosnian

Experience

Sep 2023 - Ongoing
Orbicode d.o.o. | Sarajevo
Software Engineer

Working on multiple *enterprise-level projects*, primarily in the **EMIS** (Education Management Information System) platform, **TMS** (Task Management System), **ePorodilje**, and did quality assurance for **FIS** (Financial Information System of UNSA).

Key contributions:
· Led development of ~65–70% of the GPR module in EMIS KS, including backend, frontend, and database integration.
· Implemented advanced SQL optimizations and custom reporting using Microsoft Report Builder.
· Developed an Human Resources modules for employee redeployment and recruitment.
· Built mobile-friendly UI components and integrations for TMS, improving user experience across devices.
· Worked on backend and frontend integration for ePorodilje, enabling processing of various maternity benefits.
· Contributed to FIS by integrating and testing QR code asset tracking with mobile and web apps, and implementing security and reporting features.
· Mentoring interns through the full-stack development cycle.

Aug 2023 - Sep 2023
JP "BH Telecom" d.d. | Sarajevo
Software Engineer Intern

Completed internship to fulfill academic requirements for university certification.

Key contributions:
· Assisted in backend and frontend development tasks.
· Participated in API integration and database query development.
· Gained insight into software design, enterprise systems, and agile methodologies.

Jan 2021 - May 2023
Institut za privredni inženjering d.o.o. | Zenica
IT Administrator & Web Developer

Performed dual role as IT Administrator and Web Developer.

Key contributions:
· Managed and maintained internal IT infrastructure, troubleshooting hardware and network issues.
· Developed and maintained the company's WordPress website, ensuring performance optimization and SEO compliance.
· Provided ongoing website updates, bug fixes, and content management.
